PROFESSIONAL SUMMARY

BCA student and entry-level cloud candidate with hands-on AWS, Linux, and networking experience built through practical projects and labs. Skilled in EC2, S3, IAM, VPC, Security Groups, Route Tables, and AWS CLI, along with Docker, Terraform, Kubernetes, Git, and CI/CD. Comfortable diagnosing connectivity, permission, service, and configuration failures using a systematic, command-line approach. Seeking an entry-level AWS Cloud Support Engineer role.

TECHNICAL SKILLS

Cloud: AWS, Amazon EC2, Amazon S3, AWS IAM, Amazon VPC, Security Groups, Route Tables, Subnets, Amazon CloudWatch, AWS CLI, AWS ECR, Cloud Infrastructure

Linux & Networking: Linux Administration, Linux Services, Nginx, Log Analysis, Root Cause Analysis, Monitoring, TCP/IP, Subnetting, DNS, DHCP, Routing & Switching, Network Troubleshooting, CCNA Fundamentals

DevOps & Automation: Docker, Kubernetes, Terraform, Jenkins, CI/CD, Infrastructure as Code, Git, GitHub

Security: IAM Policies, Least-Privilege Access, Security Group Rules, Authentication & Permissions Troubleshooting, DevSecOps Concepts

Programming & Scripting: Python, Bash / Linux Shell, JavaScript, SQL (Basic)

Web & Application: HTML, CSS, React.js, Next.js, Flask, REST APIs

PROJECTS

AWS Cloud Infrastructure & EC2 Web Server | *AWS, EC2, S3, IAM, VPC, Linux, Nginx, AWS CLI*

- Launched an AWS EC2 Linux instance, installed and enabled Nginx as a system service, and verified web-server functionality using local HTTP testing and service logs.
- Configured Security Group rules for SSH and HTTP, and identified the root cause of public web-access failures across security rules, routing, and service state.
- Created and managed S3 buckets and IAM users, policies, and permissions using the AWS CLI, including credential and authentication setup.
- Diagnosed AccessDenied and credential errors by isolating IAM policy, bucket permission, and CLI configuration issues.

Three-Tier Kubernetes DevSecOps Infrastructure | *AWS, Kubernetes, Docker, Terraform, Jenkins, ECR, CI/CD*

- Customized an end-to-end three-tier Kubernetes DevSecOps project for a personal AWS environment across frontend, backend, and database tiers.
- Configured Kubernetes Deployments, Services, Ingress, Secrets, persistent storage, health probes, replica counts, and rolling-update strategies.
- Integrated AWS ECR for container images, configured Terraform IaC with an S3 remote state backend, and customized the Jenkins CI/CD pipeline.

Terraform AWS Infrastructure Automation | *Terraform, AWS, S3*

- Created and validated AWS infrastructure using Terraform, configuring an S3 remote state backend and troubleshooting provider and backend errors via init, fmt, and validate.

Python Flask Docker Application | *Python, Flask, Docker, Linux*

- Containerized a Python Flask application with Docker and resolved container runtime failures through log analysis and dependency inspection.

WORK EXPERIENCE

Frontend Developer Intern — Annotation Infotech LLP | *2024 – 2026*

- Developed responsive components using HTML, CSS, JavaScript, and React.js, and integrated REST APIs with backend-connected workflows.
- Debugged application issues and performed functional testing alongside the development team through feature development and deployment.

Data Management & Office Administration — Aegis Logistics Limited | *2023*

- Managed attendance records, purchase orders, and operational documentation, preparing structured Excel reports.

EDUCATION

Bachelor of Computer Applications (BCA) — Amity University Online | *Expected 2027* | *Currently 5th Semester* | *CGPA 8.40 / 10*

CERTIFICATIONS & TRAINING

- Cisco Certified Network Associate (CCNA) — In Progress
- Cloud Computing with AWS, Internshala — 6-week practical training, completing September 2026

Immediate joiner | Willing to relocate | Open to AWS Cloud Support and Junior Cloud Engineer roles.
